

Strategic Buyer (m/f/x)

Workplace can optionally be located at one of our Semecs sites in Vrábľe (Slovakia), Uden (Netherlands) or Mosbach (Germany)

Your Responsibilities:

- Preparation and execution of contractual, price, and commercial negotiations with suppliers
- Evaluation of supply, market, capacity, and sourcing risks
- Proactive management of risks, bottlenecks, and escalations within the supply chain
- Assessment of technical concepts, specifications, and engineering change requests
- Implementation of cost optimization initiatives
- Development and continuous improvement of a high-performing supplier network
- Conducting market and technology research to derive sourcing and innovation strategies
- Management, maintenance, and updating material and supplier master data within the ERP system.

Your Profile:

- Degree in Business Administration, Engineering, or a comparable qualification
- Several years of experience in strategic procurement in an industrial environment, ideally in electronics
- Strong technical understanding and the ability to evaluate specifications, manufacturing processes, and concepts
- Analytical, strategic, and entrepreneurial mindset
- Excellent negotiation and assertiveness skills
- Confident communication and professional interaction with suppliers
- Proficient in using ERP systems, with a solid understanding of procurement master data management and data quality
- Team-oriented, proactive, resilient, flexible, and structured, with a results-driven approach
- Fluent English skills; German language skills are desirable
- Legally authorized to work in one of the following locations:
Uden (NL), Mosbach (DE) or Vrábľe (SK).

What we offer:

- Performance-based compensation
- Excellent long-term career prospects and attractive personal development opportunities within a rapidly growing company
- A challenging, responsible, and diverse position
- Team-oriented work environment within a highly motivated team.
